

COMMUNITY ACTION FOR FRESH WATER

Community Action for Fresh Water

An initiative to empower Rotary and Rotaract members **to protect, restore, and sustain** freshwater ecosystems

Take action.

Start your project with these activities:

- Clean-up local waterways and shorelines

- Seek out local experts and partnerships

- Build awareness of your local freshwater ecosystem

- Participate in collecting water samples (citizen science)

- Plant native species, removing invasive species, reforesting landscapes

- Assist in watershed planning, implementation & restoration efforts

Find resources on our Rotary-United Nations Environment Programme website:

- What are freshwater ecosystems
- Possible threats or pollutants
- How to engage local communities and stakeholders
- How to conduct citizen science
- How to organize a clean-up

Community Action for Fresh Water

Engaging and empowering communities to protect, restore, and sustain freshwater ecosystems.

- 1 member per Rotary project to record project details and activities

Why sign-up and report?

- Connect and inspire others
- Provide solutions to similar problems
- Monitor project progress and track success
- Share your project at the global scale
- Gain recognition (certificates, pins, opportunities to engage)
- Help define global outcomes and impact →
Part of Rotary's Action Plan and Area of Focus Strategy
